Requirements: ALL projects require a Site Plan

1. Sewer Easements are required from the property owner and any other property owners where the sewer line may cross. Only required if not part of a platted subdivision as previously approved by the City's Planning and Zoning Commission. Easements must be a 5-foot offset around the outer walls of the grinder/lift station and five (5) feet on each side of pressure pipe.
2. Water Easements are required for city water meter and meter service line. A ten-foot diameter easement is required around the meter pit and a ten-foot wide easement centered along the meter service line is required. Before water service is activated easements must be transferred.
3. Final Inspections: Inspection of all installations is required. A Certificate of Occupancy Permit shall not be issued until Final Inspections on water and sewer development is approved. Construction is to conform to Osage Beach Design Guidelines.
4. Serial Numbers and Specification Labels on all sewage pumps installed must be provided before station can be accepted, if applicable.
5. Approval for Acceptance of Water and Sewer Systems: Applicant must meet requirements of #1-#4 above, and must provide City staff with the required information as outlined in #1-#4 above, before the utility system will be accepted into the City inventory. Applicant will be responsible for all maintenance and electric bills until utility system meets the requirements and is accepted.
6. See Section 705.460 of the Municipal Code for backflow requirements.
7. All projects requiring DNR permits are required with application for City permit.
8. All engineering plans and inspections will require written reports to the City for entire project.

Site Dev Permit Fee shall be two percent (2%) of the estimated cost of improvements.

Permit fees are figured by a City Official.

(See attached schedule of fees)
